REPORT

OF THE

Supt. School Committee,

OF THE

Town of Lisbon,

FOR THE

Year Ending March 1, 1884.

School Report.

Your Superintendent of Schools has attended to the duties of his office and presents the following report:

There is, as there always should be a good interest in our public schools, and the committees of the several districts have endeavored to secure competent and experienced teachers as far as the public money would allow. This is becoming year by year a more difficult task because of the increasing number of branches taught. How far this can be carried with the greatest good to the greatest number, is an open question whatever more our common schools may accomplish in teaching the higher branches of education without sacrificing the primary. But let us carefully see to it that these are not neglected either by teacher or scholar. I have made no change in text books during the year save that a few of Patterson's Grammars have been taken by beginners.

I think it better adopted to the wants of our schools than Reed & Kellogg's.

The ranking system with cards for weekly reports has been kept up in most of the schools. Some system of this kind is of great value and should be continued. Thus far the cards, also the "Roll of Honor Certificates" have been furnished at my ex-

pense without charge. Some of the school rooms are not properly furnished with blackboards, and more care in the preparation of the surface might be profitably given to nearly all of them.

In respect to the teachers I will say as last year, I will not attempt a running criticism, mentioning each by name. Nearly all the teachers to have done good work; a number of them take high rank as instructors and have been appreciated by the districts where they have taught. Your superintendent will gladly help these teachers situations in a better way than a few words appended to their names after the old style. Prudential committees are invited to address him whenever they may think it for their interest to do so, and he will cheerfully render them all the aid he is able in securing the best teachers.

S. S. NICKERSON, Sup't. of Schools.

LISBON VILLAGE.

Our schools have made good progress the past year. The teachers employed have had large experience in teaching, and are faithful, industrious and conscientious in their work. It is our desire and purpose to have these schools grow, rank higher, from term to term, until they reach a standard of excellence and efficiency, second to none in all the studies pursued in these schools. To gain this end, it is highly necessary that the scholars, teachers, parents, Board of Education, and all concerned, should work heartily together for this great purpose. Ever let a wholesome interest be manifested by every one, in these schools. The subject of education is always a great and important one, and should ever receive the best mental, moral and financial aid possible.

J. L. FOSTER,

Chairman Board of Education.
